

## ***A KLOUDBusters Launch in COVID-19 World (as of 06-July-2020)***

We are planning on holding launches per our published launch schedule for the remainder of 2020. The next upcoming launch events are:

July Fun Fly July 11, 2020

August Fun Fly August 9, 2020

AIRFest 26 Sept. 4-7, 2020

The following protocols and practices will be in effect at KLOUDBusters launches until further notice.

- 1. *If you feel ill, have a fever, or have known exposure to COVID-19, STAY HOME!***
- 2. *Bring your own pen or pencil.*** KLOUDBusters will not provide writing instruments for people to use. A written Flight Card will still be required for each launch.
3. Individuals assume all risk for personal hygiene and social distancing. Each person is responsible for hand washing and personal items like hand sanitizer, protective gloves, mask, etc. as needed. **\*\*And a pen or pencil!\*\***
4. Items like flight cards, igniter clips, and table tops will be used at the launch and other people might touch them. Hygiene protocols will be used, but *If you are concerned about this you should STAY HOME.*
5. When in areas requiring interaction with others, wear a mask that covers your nose and mouth or observe social distancing of 6' or more. While not required in Sumner County, citizens "... are encouraged and otherwise recommended whenever possible to utilize face masks in an effort to mitigate the effects of COVID-19 on Sumner County."
6. RSO inspection of rockets will be performed via social distanced interview between the flyer and RSO. Per usual practice, the RSO may request demonstration and/or proof by the flyer of design and/or safety features of the rocket. Flyers and RSO are requested to wear a face covering during RSO.
7. When parking and establishing a location for your shade canopy, chairs, work table, etc. please respectfully maintain at least 10' of spacing between your site and anyone else already set-up. People traveling together may share a single personal prep area or erect their popups together if they are comfortable doing so.

The state of Kansas has issued guidelines for Travel & Exposure Related Isolation / Quarantine available here: <https://www.coronavirus.kdheks.gov/175/Travel-Exposure-Related-Isolation-Quaran> and lists specific states. The specific statement in the guidelines there is: ***"I have traveled recently and meet one of the mandatory quarantine criteria above. What should I do? Those who are under a 14-day home quarantine should stay home and monitor their symptoms. They should not attend school, work or any other setting where they are not able to maintain about a 6-foot distance from other people. If you become ill and need to seek medical attention, let your provider know that you have traveled recently or have been otherwise exposed to COVID-19. See KDHE's Isolation and Quarantine FAQ for more information."*** Our interpretation is that if you travel from one of the listed states, maintaining 6-foot distance from other people is mandated. Be prepared to social distance and wear a mask while at the Rocket Launch.
